**MEAG Power Votes to Continue Construction of Plant Vogtle Units 3 & 4**

**(Atlanta, GA) – September 24, 2018** – The Board of MEAG Power voted unanimously today to continue construction of Plant Vogtle Units 3 & 4. MEAG Power joins co-owners, Georgia Power and the City of Dalton, which had, earlier, voted to continue. We await a determination from Oglethorpe Power, from whom an affirmative vote is also necessary for the project to continue.

MEAG Power will issue a more detailed statement following release of Oglethorpe’s decision.

*MEAG Power is a nonprofit entity that was created by the Georgia General Assembly in 1975 to generate and transmit reliable, competitively priced wholesale electric power to 49 Participant communities throughout the state. These communities have access to MEAG Power’s multibillion-dollar resources, including some of the lowest-cost, emissions-free energy in the region, as well as one of the most diversified fuel portfolios. MEAG Power operates in one of the largest and fastest-growing regions in the United States because of Georgia’s attractive logistics, pro-business environment and talented workforce.*
